Overview of the program:

With the current trend of research and study, librarians need to be more pro-active in engaging with the readers by better understanding the entire ecosystem of research ranging from authoring to publishing, analytics and measurement. The training program is designed to provide librarians with a comprehensive set of skills in the management and development of information sources and databases for libraries. A program designed specifically for librarian leader - Support for innovative thinking and practice in work management - Support for training and research and Enhance the university ranking.

AGENDA

Morning

8:30-10:00 The Changing Workflow of Researchers for Digital Scholarship

10:00-10:20 Tea Break

10:20-12:00 Support in Digital Literacy: Learning, Collaborating & Researching

12:00-13:30 Lunch

Afternoon

13:30-14:30 Research Dissemination to Outreaching in Digital: Institutional Repository & Open Access

14:30-15:30 Facilitated Discussion in Groups: “To Develop a Library Strategy of Digital Scholarship for Research Support”, Part 1

15:30-15:45 Tea Break

15:45-16:30 Facilitated Discussion in Groups: “To Develop a Library Strategy of Digital Scholarship for Research Support”, Part 2

16:30-17:30 Digital Solution to Research Plagiarism through Blockchain Technology: Research Data & Artefact Management

SYNOPSIS

Research support in library has evolved over decades and it has gone beyond by simply managing the collections of database or publications. With the adoption of digital scholarship, the entire workflow of research has affected right from authoring to publishing, outreaching and analytics. This creates an opportunity of library leadership in supporting the adoption and increasing the research visibility and quality. In this one-day Digital Scholarship Program for librarians, there are three questions to address to:

- 1. How digital scholarship impacts the researchers' workflow?**
- 2. How to support researchers in managing their research evidences digitally?**
- 3. How to equip the researchers with digital skills of research for better visibility and quality?**
